Independent label check: the result

Civic Operations · Group 23 · marked by Mohammad Alharthi, scored by Sankalp Sandeep Indish

What was checked

I wrote the slot rules and hand marked all 308 test messages myself, so a mistake I make every time would be invisible. Mohammad marked 30 of them on his own, drawn at random with the seed 20261009, without seeing my answers. This compares his answers with mine, slot by slot.

The result

Slot	Agreement over all 30 rows	Over rows where either of us marked something
Address	30 of 30	3 of 3
Cross street	30 of 30	none marked
Borough	30 of 30	none marked
Time	24 of 30	1 of 7

Request type: Mohammad returned 0 of 30, so the request type column is not scored. It is reported as not returned, never filled in afterwards.

Most of the 30 messages rightly have no address, cross street or borough, so the agreement over all rows is high mostly because both of us left the same boxes empty. The fairer number is the third column. Addresses agree completely. No message in this draw had a cross street or a borough, so those two slots are not tested by it.

Where we disagreed: Time

ID	Message	Mohammad	Me	The rule it turns on
G168	half my sockets are dead and the super keeps saying hell come tomorrow	tomorrow	nothing	the time must say when the problem started or how long it has lasted, and tomorrow is when the super promised to come
G209	guys hang out on the corner with a speaker every night till 3	every night till 3	nothing	pure frequency is not a time, so every night gets nothing
G230	trash all over the sidewalk outside the bodega every morning	every morning	nothing	pure frequency is not a time, so every morning gets nothing
G251	barely any pressure in the shower for the last few days	last few days	for the last few days	include the leading preposition, so for the last few days
G282	theres a constant stream along the gutter and it hasnt rained in days	in days	nothing	in days is how long it has not rained, not how long the problem has lasted
G307	one moment	one moment	nothing	a message with no problem in it gets no slots

Read against the written rules, my answers follow them in all six. But the purpose of the check is whether the rules are clear to someone else, and for Time they were not: one disagreement is about the leading preposition, two about frequency, and three about whether a time describes the problem at all. So the Time rule should be rewritten to say, with an example each, that a promised visit, the weather and small talk are not the problem's time.

Mohammad's sheet, exactly as returned

ID	Message	Address	Cross street	Borough	Time	Request

						type
G035	fire hydrant leaking on east tremont	east tremont				
G048	the street sweeper hasnt come in weeks				in weeks
